### LUG builds VAL Aircargo Centre

**LUG is building a new VAL Aircargo Centre on its premises at Frankfurt airport. After receiving the planning permission in February construction is going to start in the second quarter of 2014.**

We already offer safe storage facilities for valuables in addition to special warehousing for perishables. Now we are planning a new VAL Aircargo Centre on our premises in the Cargo City South of Frankfurt International Airport. The project is planned in cooperation with government authorities and Brink's, the globally well-known and recognized specialist in the area of safe transportation of valuables and associated security-related services.

This state-of-the-art valuables storage facility will meet customer needs also in the future. It includes high security areas for loading and unloading vans and trucks, separate acceptance and delivery areas, a multi-door system, a ULD-area including a 7,5 to weighbridge, secured areas for pick and pack as well as consolidation/deconsolidation, ULD build up and break down according to IATA regulations, a secured area for money processing, round the clock camera surveillance, explosive detector, and 24/7 handling.

We offer strong room facilities in the Cargo City South at Frankfurt/Main airport since 1997. Previously, in the 1970s, we operated a strong room in the Cargo City North. Since September 1, 2012 we co-operate with the renowned firm Brink's in the operation of the strong room. Brink's offers a professional risk management that is part of the work structures of each employee as well as an insurance that is unique in the German market.

We are certain that the new VAL Aircargo Centre will offer optimal conditions for this very special freight category.
